---	---------------------------------------

Note:

- I. You use Product Recovery discs to restore the contents of the hard disk to its original factory state. Product Recovery discs are useful if you transfer the computer to another area, sell the computer, recycle the computer, or as a last resort put the computer in an operational state after all other methods of recovery have failed.
- II. To create a set of Product Recovery discs, you must have a CD or DVD drive capable of recording on writable CD or DVD media. When you create your set of Product Recovery discs, depending on the media you use, you may need to use several CD discs (Require about 7 CDs or 2 DVDs for recent models).
- III. Attention: Your Microsoft(R) Windows(R) license permits you to create only one set of Product Recovery discs, so it is important that you store the discs in a safe place after you make them.
- IV. When you use the Product Recovery discs, all data and partitions on your hard disk are deleted and restored to the original factory state.

注意：

- I. 您可以使用產品回復光碟，將硬碟的內容還原成出廠狀態。如果您將電腦轉送到另一個地區、販售該電腦、將電腦資源回收，或是在所有回復方法均失敗後，做為使電腦恢復運作的最後方法，則產品回復光碟會非常有用。
- II. 如果要建立一組產品回復光碟，您必須具備能夠燒錄可讀寫 CD 或 DVD 媒體的 CD 光碟機或 DVD 光碟機。在建立您的產品回復光碟組時，您將需要多張光碟（視乎使用的媒體而定，一般需要大約 7 片 CD 或 2 片 DVD）。
- III. 請注意：Microsoft(R) Windows(R) 只授權您建立一組產品回復光碟，因此在製作之後，將光碟放在安全的地方是很重要的。
- IV. 當您使用產品回復光碟時，將會刪除您硬碟上的所有資料和分割區，將硬碟還原成出廠內容。
