Energy Consumption and Scope 1 & Scope 2 GHG Emissions:
Most energy consumption and Scope 1 & Scope 2 GHG emissions data were historical in nature, data consisting of metered consumption, though some Scope 2 emissions were estimated based on square feet of leased area and an assumed electric consumption rate.

Scope 3 GHG Emissions:
Data and information supporting the Scope 3 GHG Report were in many cases estimated rather than historical in nature.

VERIFICATION PERIOD:
April 1st, 2020 to March 31st 2021 (FY 2020/2021)

Energy Consumption and Scope 1 & Scope 2 GHG Emissions:
The level of assurance agreed is reasonable.

Scope 3 GHG Emissions:
The level of assurance agreed is limited.

Materiality:
The materiality required of this verification was considered by TÜV SÜD Slovakia s.r.o to be below 5% for deviations in sampled data.

GHG AND ENERGY VERIFICATION METHODOLOGY:
- Agreement on the level of verification, objectives, criteria, organisational scope and materiality thresholds;
- Review of the processes and procedures for establishing the organisational boundary, ensuring relevance in emissions reporting across direct and indirect emissions sources;
- Facility Teleconference Audit (due to travel restrictions related to COVID-9 pandemic, on-site visits were not
allowed):

UNMODIFIED OPINION:

Based on the above-described verification conducted in accordance with ISO 14064-3:2019 standard and review of all available documentation, TÜV SÜD Slovakia s.r.o. comes to the conclusion that the Lenovo energy consumption and Scope 1 and Scope 2 GHG reports are made in accordance with the requirements of ISO 14064-1:2018 standard and the voluntary WRI/WBCSD GHG Protocol Corporate Accounting and Reporting Standard. TÜV SÜD Slovakia s.r.o. concludes with reasonable assurance that **reviewed documents are materially correct and fairly represent the required parameters without material discrepancies.**

Based on the data and information provided by Lenovo and the processes and procedures conducted, TÜV SÜD Slovakia s.r.o. concludes with limited assurance there is no evidence that the Scope 3 GHG statement:

- is not materially correct;
- is not a fair representation of the GHG emissions data and information; and
- is not prepared in accordance with the WRI/WBCSD Greenhouse Gas Protocol Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

It is our opinion that Lenovo has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of its energy consumption and Scope 1, Scope 2 & Scope 3 GHG emissions for the stated period and boundaries. The GHG emissions information for the period 04/01/2020 – 03/31/2021 is verified by TÜV SÜD Slovakia s.r.o. to a reasonable level of assurance for Lenovo energy consumption and Scope 1 & 2 GHG emissions, and limited level of assurance for Scope 3 GHG emissions, consistent with the agreed verification scope, objectives and criteria.
