VPAT for VPAT_LanSchool	
VPAT comments:	http://www.lanschool.com/

VPAT Summary

Criteria	Status	Remarks and Explanations
§ 508-1194.21 Software Applications and Operating Systems	Supports with Exceptions	Refer to Section 1194.21 in VPAT Details section below.
§ 508-1194.22 Web Sites and Applications	Supports	Refer to Section 1194.22 in VPAT Details section below.
§ 508-1194.24 - Video and Multimedia Products.	Supports	Refer to Section 1194.24 in VPAT Details section below.
§ 508-1194.31 Functional performance criteria	Supports with Exceptions	Refer to Section 1194.31 in VPAT Details section below.
§ 508-1194.41 Information, documentation, and support	Supports with Exceptions	Refer to Section 1194.41 in VPAT Details section below.

VPAT Details

§ 508-1194.21 Software Applications and Operating Systems - Detail

Criteria	Supports	Remarks and Explanations
(a) Ensure keyboard control of application	Supports with Exceptions	Product meets most accessibility criteria. Tab keys are to use to navigate within the help system. All active controls have associated keyboard functions. Note:Some interactive elements in an application panel are not keyboard accessible.
(b) Applications shall not disrupt or disable accessibility features	Supports Operating systems provide accessibility features that allow disabled users to customize their references. This application preserves those accessibility user preference settings. For example, if Sticky Keys option is selected by a mobility-impaired user, this option will continue to be activated when used with this application.	Product meets accessibility criteria. Product uses standard keyboard accessibility features built into the operating system.
(c) On-screen & programmatic indication of focus	Supports with Exceptions	Product meets most accessibility criteria. Tab keys are to use to navigate within the help system. All active controls have associated keyboard functions.

Criteria	Supports	Remarks and Explanations
		Note:Some interactive elements in an application panel will require keyboard focus management.
(d) Information about a user interface element must be textually available	Supports This software application allows a screen reader to describe the user interface environment and controls to a blind user. For example, if you tab through a form and find a radio button, the user would be able to determine it is a radio button and the current selection status of the button.	Product meets accessibility criteria. Information is provided for all objects, icons, and images. All controls are labeled and images have accompanying text.
(e) Use images in a standard fashion	Supports The meaning assigned to images used in the application is consistent and unique, minimizing confusion of the context of use for those images.	Product meets accessibility criteria. A consistent feel is used for all controls and images. All controls are labeled and have accompanying text.
(f) Textual information shall be provided through operating system functions	Supports Text information is accessible so assistive technologies can communicate content, attributes and caret location to blind users.	Product meets most accessibility criteria. All controls use standard calls and methods for setting text. All text is screen readable.
(g) Applications shall not override user selected contrast and color selections.	Supports System settings are inherited by the application so that customized preferences will not need to be continually reset. For example, color contrast settings enhanced for a low vision user would be preserved by the application.	Product meets accessibility criteria. Applications do not override user selected contrast and color selections.
(h) Ensure information is displayable without animation	Supports Application provides an option to display animation in a nonanimated mode, allowing users with vision impairments equal access to the same information and reliable interaction with assistive technology.	Product meets accessibility criteria.
(i) Color not the only means of conveying information.	Supports Color is used only as an enhancement, and an alternate means to convey information or indicate an action is available to users with visual impairments.	Product meets accessibility criteria. Color is only used as an enhancement and is never used as a means of providing information.
(j) Color settings control	Supports When color customization is supported, a variety of color selections and a range of contrast	Product meets accessibility criteria.

Criteria	Supports	Remarks and Explanations
	improves accessibility for users with vision impairments.	
(k) Do not use flashing or blinking elements	Supports The use of blinking text, objects or elements has been avoided, reducing risk of seizures for users with photosensitive epilepsy.	Product meets accessibility criteria. Blinking and flashing objects are not used.
(l) Ensure usability of electronic forms	Supports The application design allows assistive technology access to information, field elements, and functionality required to complete and submit forms.	Product meets accessibility criteria.

§ 508-1194.22 Web Sites and Applications - Detail

Criteria	Supports	Remarks and Explanations
(a) Text equivalent of non-text items	Not Applicable	Not Applicable
(b) Provide synchronized alternatives for media	Not Applicable	Not Applicable
(c) Information should not be conveyed only with color	Supports	Product meets accessibility criteria. Color is only used as an enhancement and is never used as a means of providing information.
(d) Documents must be readable without style sheets	Not Applicable	Not Applicable
(e) Redundant text link for server-side image maps	Not Applicable	Not Applicable
(f) Client side images maps should be used	Not Applicable	Not Applicable
(g) Identify table headers	Not Applicable	Not Applicable
(h) Associate table and header cells	Not Applicable	Not Applicable
(i) Properly title frames	Not Applicable	Not Applicable
(j) Avoid causing pages to flicker	Supports	Product meets accessibility criteria. Blinking and flashing objects are not used.
(k) As a last resort provide a text-only page	Not Applicable	Not Applicable
(l) Ensure scripts are accessible	Not Applicable	Not Applicable
(m) Provide a link to an accessible plug-in	Not Applicable	Not Applicable
(n) Ensure electronic forms are accessible	Not Applicable	Not Applicable
(o) Provide a method for skipping repetitive links	Not Applicable	Not Applicable

Criteria	Supports	Remarks and Explanations
(p) Ensure user control over timed responses	Not Applicable	Not Applicable

§ 508-1194.24 - Video and Multimedia Products. - Detail

Criteria	Supports	Remarks and Explanations
(a) Caption decoder circuitry	Not Applicable	Not applicable.
(b) Secondary audio playback circuitry	Not Applicable	Not applicable.
(c) Content shall be open or closed captioned	Not Applicable	Not applicable.
(d) Content shall be audio described	Supports Training and informational video and multimedia provided with the product supports audio descriptions of visual information for blind users.	Product meets accessibility criteria.
(e) Captioning or audio description selectability	Not Applicable	Not applicable.

§ 508-1194.31 Functional performance criteria - Detail

Criteria	Supports	Remarks and Explanations
(a) Ensure access for blind and visually impaired	Supports with Exceptions	Product meets most of the accessibility criteria. However some interactive elements are not keyboard accessible.
(b) Ensure access for low vision users	Supports with Exceptions	Product meets most of the accessibility criteria. High contrast mode functions provided by operating system are usable. However, some interactive elements are not keyboard accessible.
(c) Ensure access for deaf individuals	Supports Hardware is designed to alert the software application of system sounds when needed and the software then provides a visual cue so that deaf or hard of hearing users can complete the task. See the following for other supporting features: - 1194.22 b, m - 1194.23 k4 - 1194.24 c - 1194.25 e, f	All accessibility criteria is met. Product is designed to alert users of system sounds when needed and a visual cue is also provided.
(d) Ensure access for users with assistive hearing devices	Supports Hardware provides a physical volume control and/or an interface	Product meets accessibility criteria.

Criteria	Supports	Remarks and Explanations
	so that volume can be controlled by software. See the following for other supporting features: - 1194.23 k4 - 1194.25 e, f	
(e) Ensure user speech is not required for access	Supports	Product meets accessibility criteria. User speech is not required.
(f) Ensure users with mobility impairments can use application	Supports See the following for supporting features: - 1194.21 a, b - 1194.22 l, p - 1194.23 k1, k2, k3 - 1194.25 b, j1, j2, j3, j4 - 1194.26 d	Product meets accessibility criteria.

§ 508-1194.41 Information, documentation, and support - Detail

Criteria	Supports	Remarks and Explanations
(a) Product documentation must be provided in alternate formats	Supports Product support documentation is provided in at least one accessible format.	Documentation will be provided in an accessible format upon request at no charge to the user.
(b) Describe accessibility features properly	Supports with Exceptions	Some accessibility features will be provided in documentation upon request.
(c) Support the communication mode of users with disabilities	Supports In addition to standard IBM help desk and support Web sites, IBM has established a TTY telephone service for use by deaf or hard of hearing customers to access sales and support services.	Product meets accessibility criteria. Support for hearing impaired is provided via email from help desk.
