| Criteria  | Supporting<br>Features | Remarks and explanations                |
|---|------------------------|---|
| (a) When software is designed to run on<br>a system that has a keyboard, product<br>functions shall be executable from a<br>keyboard where the function itself or the<br>result of performing a function can be<br>discerned textually. | Not applicable         | This product does not contain software. |
| (b) Applications shall not disrupt or   |                        |   |

Section 1194.21 Software Applications and Operating Systems – Detail

| functions shall be executable from a<br>keyboard where the function itself or the<br>result of performing a function can be<br>discerned textually.   | Not applicable | This product does not contain software. |
|---|----------------|---|
| (b) Applications shall not disrupt or<br>disable activated features of other<br>products that are identified as<br>accessibility features, where those<br>features are developed and documented<br>according to industry standards.<br>Applications also shall not disrupt or<br>disable activated features of any<br>operating system that are identified as | Not applicable | This product does not contain software. |

| Section 1194.21 Software Applications and Operating Systems – Detail   |                        |   |  |
|--|------------------------|---|--|
| Criteria   | Supporting<br>Features | Remarks and explanations                |  |
| accessibility features where the<br>application programming interface for<br>those accessibility features has been<br>documented by the manufacturer of the<br>operating system and is available to the<br>product developer.  |                        |   |  |
| (c) A well-defined on-screen indication of<br>the current focus shall be provided that<br>moves among interactive interface<br>elements as the input focus changes.<br>The focus shall be programmatically<br>exposed so that Assistive Technology<br>can track focus and focus changes.             | Not applicable         | This product does not contain software. |  |
| (d) Sufficient information about a user<br>interface element including the identity,<br>operation and state of the element shall<br>be available to Assistive Technology.<br>When an image represents a program<br>element, the information conveyed by the<br>image must also be available in text. | Not applicable         | This product does not contain software. |  |
| (e) When bitmap images are used to<br>identify controls, status indicators, or<br>other programmatic elements, the<br>meaning assigned to those images shall<br>be consistent throughout an application's<br>performance.  | Not applicable         | This product does not contain software. |  |
| (f) Textual information shall be provided<br>through operating system functions for<br>displaying text. The minimum information<br>that shall be made available is text<br>content, text input caret location, and text<br>attributes.   | Not applicable         | This product does not contain software. |  |
| (g) Applications shall not override user<br>selected contrast and color selections<br>and other individual display attributes.   | Not applicable         | This product does not contain software. |  |
| (h) When animation is displayed, the<br>information shall be displayable in at<br>least one non-animated presentation<br>mode at the option of the user.   | Not applicable         | This product does not contain software. |  |
| (i) Color coding shall not be used as the<br>only means of conveying information,<br>indicating an action, prompting a<br>response, or distinguishing a visual<br>element.   | Not applicable         | This product does not contain software. |  |

| Section 1194.21 Software Applications and Operating Systems – Detail  |                        |   |
|---|------------------------|---|
| Criteria  | Supporting<br>Features | Remarks and explanations                |
| (j) When a product permits a user to<br>adjust color and contrast settings, a<br>variety of color selections capable of<br>producing a range of contrast levels shall<br>be provided.   | Not applicable         | This product does not contain software. |
| (k) Software shall not use flashing or<br>blinking text, objects, or other elements<br>having a flash or blink frequency greater<br>than 2 Hz and lower than 55 Hz.   | Not applicable         | This product does not contain software. |
| (I) When electronic forms are used, the<br>form shall allow people using Assistive<br>Technology to access the information,<br>field elements, and functionality required<br>for completion and submission of the<br>form, including all directions and cues. | Not applicable         | This product does not contain software. |

| Section 1194.22 Web-based Internet information and applications – Detail  |                        |  |
|---|------------------------|--|
| Criteria  | Supporting<br>Features | Remarks and explanations                         |
| (a) A text equivalent for every non-text<br>element shall be provided (e.g., via "alt",<br>"longdesc", or in element content).  | Not applicable         | Product does not contain web-based applications. |
| (b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.  | Not applicable         | Product does not contain web-based applications. |
| (c) Web pages shall be designed so that<br>all information conveyed with color is also<br>available without color, for example from<br>context or markup.             | Not applicable         | Product does not contain web-based applications. |
| (d) Documents shall be organized so they<br>are readable without requiring an<br>associated style sheet.  | Not applicable         | Product does not contain web-based applications. |
| (e) Redundant text links shall be provided<br>for each active region of a server-side<br>image map.   | Not applicable         | Product does not contain web-based applications. |
| (f) Client-side image maps shall be<br>provided instead of server-side image<br>maps except where the regions cannot be<br>defined with an available geometric shape. | Not applicable         | Product does not contain web-based applications. |
| (g) Row and column headers shall be identified for data tables.   | Not applicable         | Product does not contain web-based applications. |

| Section 1194.22 Web-based Internet information and applications – Detail  |                        |  |
|---|------------------------|--|
| Criteria  | Supporting<br>Features | Remarks and explanations                         |
| (h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.  | Not applicable         | Product does not contain web-based applications. |
| (i) Frames shall be titled with text that facilitates frame identification and navigation   | Not applicable         | Product does not contain web-based applications. |
| (j) Pages shall be designed to avoid<br>causing the screen to flicker with a<br>frequency greater than 2 Hz and lower<br>than 55 Hz.  | Not applicable         | Product does not contain web-based applications. |
| (k) A text-only page, with equivalent<br>information or functionality, shall be<br>provided to make a web site comply with<br>the provisions of this part, when<br>compliance cannot be accomplished in<br>any other way. The content of the text-only<br>page shall be updated whenever the<br>primary page changes. | Not applicable         | Product does not contain web-based applications. |
| (I) When pages utilize scripting languages<br>to display content, or to create interface<br>elements, the information provided by the<br>script shall be identified with functional text<br>that can be read by Assistive Technology.   | Not applicable         | Product does not contain web-based applications. |
| (m) When a web page requires that an<br>applet, plug-in or other application be<br>present on the client system to interpret<br>page content, the page must provide a link<br>to a plug-in or applet that complies with<br>§1194.21(a) through (I).   | Not applicable         | Product does not contain web-based applications. |
| (n) When electronic forms are designed to<br>be completed on-line, the form shall allow<br>people using Assistive Technology to<br>access the information, field elements, and<br>functionality required for completion and<br>submission of the form, including all<br>directions and cues.                          | Not applicable         | Product does not contain web-based applications. |
| (o) A method shall be provided that permits users to skip repetitive navigation links.  | Not applicable         | Product does not contain web-based applications. |
| (p) When a timed response is required, the<br>user shall be alerted and given sufficient<br>time to indicate more time is required.   | Not applicable         | Product does not contain web-based applications. |

| Section 1194.23 Telecommunications Products – Detail   |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations                               |
| (a) Telecommunications products or<br>systems which provide a function allowing<br>voice communication and which do not<br>themselves provide a TTY functionality<br>shall provide a standard non-acoustic<br>connection point for TTYs. Microphones<br>shall be capable of being turned on and off<br>to allow the user to intermix speech with<br>TTY use. | Not applicable         | Product is not a telecommunications product or system. |
| (b) Telecommunications products which<br>include voice communication functionality<br>shall support all commonly used cross-<br>manufacturer non-proprietary standard<br>TTY signal protocols.   | Not applicable         | Product is not a telecommunications product or system. |
| (c) Voice mail, auto-attendant, and<br>interactive voice response<br>telecommunications systems shall be<br>usable by TTY users with their TTYs.   | Not applicable         | Product is not a telecommunications product or system. |
| (d) Voice mail, messaging, auto-attendant,<br>and interactive voice response<br>telecommunications systems that require a<br>response from a user within a time<br>nterval, shall give an alert when the time<br>nterval is about to run out, and shall<br>provide sufficient time for the user to<br>ndicate more time is required.                         | Not applicable         | Product is not a telecommunications product or system. |
| (e) Where provided, caller identification<br>and similar telecommunications functions<br>shall also be available for users of TTYs,<br>and for users who cannot see displays.  | Not applicable         | Product is not a telecommunications product or system. |
| (f) For transmitted voice signals,<br>elecommunications products shall provide<br>a gain adjustable up to a minimum of 20<br>dB. For incremental volume control, at<br>east one intermediate step of 12 dB of<br>gain shall be provided.   | Not applicable         | Product is not a telecommunications product or system. |
| (g) If the telecommunications product<br>allows a user to adjust the receive volume,<br>a function shall be provided to<br>automatically reset the volume to the<br>default level after every use.   | Not applicable         | Product is not a telecommunications product or system. |
| (h) Where a telecommunications product<br>delivers output by an audio transducer<br>which is normally held up to the ear, a<br>means for effective magnetic wireless   | Not applicable         | Product is not a telecommunications product or system. |

| Section 1194.23 Telecommunications Products – Detail   |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations   |
| coupling to hearing technologies shall be provided.  |                        |  |
| (i) Interference to hearing technologies<br>(including hearing aids, cochlear implants,<br>and assistive listening devices) shall be<br>reduced to the lowest possible level that<br>allows a user of hearing technologies to<br>utilize the telecommunications product.   | Not applicable         | Product is not a telecommunications product or system.   |
| (j) Products that transmit or conduct<br>information or communication, shall pass<br>through cross-manufacturer, non-<br>proprietary, industry-standard codes,<br>translation protocols, formats or other<br>information necessary to provide the<br>information or communication in a usable<br>format. Technologies which use encoding,<br>signal compression, format transformation,<br>or similar techniques shall not remove<br>information needed for access or shall<br>restore it upon delivery. | Not applicable         | Product is not a telecommunications product or system.   |
| (k)(1) Products which have mechanically<br>operated controls or keys shall comply<br>with the following: Controls and Keys shall<br>be tactilely discernible without activating<br>the controls or keys.   | Supports               | Touch can be used to identify and distinguish controls and keys without activating them.   |
| (k)(2) Products which have mechanically<br>operated controls or keys shall comply<br>with the following: Controls and Keys shall<br>be operable with one hand and shall not<br>require tight grasping, pinching, twisting of<br>the wrist. The force required to activate<br>controls and keys shall be 5 lbs. (22.2N)<br>maximum.   | Supports               | Controls and latches can be reached and<br>operated using one hand and require<br>minimal dexterity for ease of use by<br>mobility impaired users. |
| (k)(3) Products which have mechanically<br>operated controls or keys shall comply<br>with the following: If key repeat is<br>supported, the delay before repeat shall<br>be adjustable to at least 2 seconds. Key<br>repeat rate shall be adjustable to 2<br>seconds per character.  | Supports               | Users can use Keyboard Customized<br>Utility via Lenovo-US URL to change<br>keyboard repeat rate.  |
| (k)(4) Products which have mechanically<br>operated controls or keys shall comply<br>with the following: The status of all locking<br>or toggle controls or keys shall be visually   | Supports               | The status of locking and toggle controls<br>or keys can be seen as well as<br>distinguished by touch and/or sound<br>when activated.              |

| Section 1194.23 Telecommunications Products – Detail        |                        |                          |
|---|------------------------|--------------------------|
| Criteria  | Supporting<br>Features | Remarks and explanations |
| discernible, and discernible either through touch or sound. |                        |                          |

| Section 1194.24 Video and Multi-media Products – Detail  |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations   |
| a) All analog television displays 13 inches<br>and larger, and computer equipment that<br>includes analog television receiver or<br>display circuitry, shall be equipped with<br>caption decoder circuitry which<br>appropriately receives, decodes, and<br>displays closed captions from broadcast,<br>cable, videotape, and DVD signals. As<br>soon as practicable, but not later than July<br>1, 2002, widescreen digital television<br>(DTV) displays measuring at least 7.8<br>inches vertically, DTV sets with<br>conventional displays measuring at least<br>13 inches vertically, and stand-alone DTV<br>tuners, whether or not they are marketed<br>with display screens, and computer<br>equipment that includes DTV receiver or<br>display circuitry, shall be equipped with<br>caption decoder circuitry which<br>appropriately receives, decodes, and<br>displays closed captions from broadcast,<br>cable, videotape, and DVD signals. | Not applicable         | Product is not an analog television.   |
| (b) Television tuners, including tuner cards<br>for use in computers, shall be equipped<br>with secondary audio program playback<br>circuitry.   | Not applicable         | Product is not a television tuner.   |
| (c) All training and informational video and<br>multimedia productions which support the<br>agency's mission, regardless of format,<br>that contain speech or other audio<br>information necessary for the<br>comprehension of the content, shall be<br>open or closed captioned.  | Not applicable         | Product does not contain informational<br>videos or multimedia productions, as<br>specified. |

| Section 1194.24 Video and Multi-media Products – Detail  |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations   |
| (d) All training and informational video and<br>multimedia productions which support the<br>agency's mission, regardless of format,<br>that contain visual information necessary<br>for the comprehension of the content,<br>shall be audio described. | Not applicable         | Product does not contain informational<br>videos or multimedia productions, as<br>specified. |
| (e) Display or presentation of alternate<br>text presentation or audio descriptions<br>shall be user-selectable unless<br>permanent.   | Not applicable         | There are no alternate text presentations or audio descriptions.                             |

| Section 1194.25 Self-Contained, Closed Products – Detail   |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations                 |
| (a) Self contained products shall be usable<br>by people with disabilities without requiring<br>an end-user to attach Assistive<br>Technology to the product. Personal<br>headsets for private listening are not<br>Assistive Technology.  | Not applicable         | Product is not a self contained product. |
| (b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.  | Not applicable         | Product is not a self contained product. |
| (c) Where a product utilizes touchscreens<br>or contact-sensitive controls, an input<br>method shall be provided that complies<br>with §1194.23 (k) (1) through (4).   | Not applicable         | Product is not a self contained product. |
| (d) When biometric forms of user<br>identification or control are used, an<br>alternative form of identification or<br>activation, which does not require the user<br>to possess particular biological<br>characteristics, shall also be provided.   | Not applicable         | Product is not a self contained product. |
| (e) When products provide auditory output,<br>the audio signal shall be provided at a<br>standard signal level through an industry<br>standard connector that will allow for<br>private listening. The product must provide<br>the ability to interrupt, pause, and restart<br>the audio at anytime. | Not applicable         | Product is not a self contained product. |

| Section 1194.25 Self-Contained, Closed Products – Detail   |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations                 |
| (f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.   | Not applicable         | Product is not a self contained product. |
| (g) Color coding shall not be used as the<br>only means of conveying information,<br>indicating an action, prompting a response,<br>or distinguishing a visual element.  | Not applicable         | Product is not a self contained product. |
| (h) When a product permits a user to<br>adjust color and contrast settings, a range<br>of color selections capable of producing a<br>variety of contrast levels shall be provided.   | Not applicable         | Product is not a self contained product. |
| (i) Products shall be designed to avoid<br>causing the screen to flicker with a<br>frequency greater than 2 Hz and lower<br>than 55 Hz.  | Not applicable         | Product is not a self contained product. |
| (j) (1) Products which are freestanding,<br>non-portable, and intended to be used in<br>one location and which have operable<br>controls shall comply with the following:<br>The position of any operable control shall<br>be determined with respect to a vertical<br>plane, which is 48 inches in length,<br>centered on the operable control, and at<br>the maximum protrusion of the product<br>within the 48 inch length on products which<br>are freestanding, non-portable, and<br>intended to be used in one location and<br>which have operable controls. | Not applicable         | Product is not a self contained product. |
| (j)(2) Products which are freestanding,<br>non-portable, and intended to be used in<br>one location and which have operable<br>controls shall comply with the following:<br>Where any operable control is 10 inches or<br>less behind the reference plane, the height<br>shall be 54 inches maximum and 15<br>inches minimum above the floor.  | Not applicable         | Product is not a self contained product. |
| (j)(3) Products which are freestanding,<br>non-portable, and intended to be used in<br>one location and which have operable  | Not applicable         | Product is not a self contained product. |

| Section 1194.25 Self-Contained, Closed Products – Detail  |                        |  |
|---|------------------------|--|
| Criteria  | Supporting<br>Features | Remarks and explanations                 |
| controls shall comply with the following:<br>Where any operable control is more than<br>10 inches and not more than 24 inches<br>behind the reference plane, the height<br>shall be 46 inches maximum and 15<br>inches minimum above the floor.               |                        |  |
| (j)(4) Products which are freestanding,<br>non-portable, and intended to be used in<br>one location and which have operable<br>controls shall comply with the following:<br>Operable controls shall not be more than<br>24 inches behind the reference plane. | Not applicable         | Product is not a self contained product. |

| Section 1194.26 Desktop and Portable Computers – Detail  |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations   |
| (a) All mechanically operated controls and keys shall comply with §1194.23 (k) (1) through (4).  | Supports               | See 1194.23(k) 1 through 4.  |
| (b) If a product utilizes touchscreens or<br>touch-operated controls, an input method<br>shall be provided that complies with<br>§1194.23 (k) (1) through (4).   | Supports               | See 1194.23(k) 1 through 4.  |
| (c) When biometric forms of user<br>identification or control are used, an<br>alternative form of identification or<br>activation, which does not require the user<br>to possess particular biological<br>characteristics, shall also be provided. | Supports               | When biometric forms of user<br>identification are used, an alternative<br>means of identification is available.                       |
| (d) Where provided, at least one of each<br>type of expansion slots, ports and<br>connectors shall comply with publicly<br>available industry standards  | Supports               | The product design uses industry<br>standard ports so that alternative<br>equipment and assistive technologies<br>can be accommodated. |

| Section 1194.31 Functional Performance Criteria – Detail   |                        |  |
|--|------------------------|--|
| Criteria   | Supporting<br>Features | Remarks and explanations   |
| (a) At least one mode of operation and<br>information retrieval that does not require<br>user vision shall be provided, or support<br>for Assistive Technology used by people<br>who are blind or visually impaired shall be<br>provided.  | Supports               | See the following for supporting<br>features:<br>- 1194.21 a, b, c, d, e, f, h, i, l<br>- 1194.22 all<br>- 1194.23 k1, k4<br>- 1194.24 d<br>- 1194.25 a, b, c, e, f, g<br>- 1194.26 b, d                     |
| (b) At least one mode of operation and<br>information retrieval that does not require<br>visual acuity greater than 20/70 shall be<br>provided in audio and enlarged print output<br>working together or independently, or<br>support for Assistive Technology used by<br>people who are visually impaired shall be<br>provided. | Supports               | See the following for supporting<br>features:<br>- 1194.21 c, g, i, j, l<br>- 1194.22 n<br>- 1194.25 h<br>- 1194.26 d  |
| (c) At least one mode of operation and<br>information retrieval that does not require<br>user hearing shall be provided, or support<br>for Assistive Technology used by people<br>who are deaf or hard of hearing shall be<br>provided   | Supports               | System is designed to alert<br>applications of system sounds when<br>needed and a visual cue is also<br>provided.  |
| (d) Where audio information is important<br>for the use of a product, at least one mode<br>of operation and information retrieval shall<br>be provided in an enhanced auditory<br>fashion, or support for assistive hearing<br>devices shall be provided.  | Supports               | Hardware provides a physical volume<br>control and/or an interface so that<br>volume can be controlled by software.<br>See the following for other supporting<br>features:<br>- 1194.23 k4<br>- 1194.25 e, f |
| (e) At least one mode of operation and<br>information retrieval that does not require<br>user speech shall be provided, or support<br>for Assistive Technology used by people<br>with disabilities shall be provided.  | Supports               | User speech is not required.   |
| (f) At least one mode of operation and<br>information retrieval that does not require<br>fine motor control or simultaneous actions<br>and that is operable with limited reach and<br>strength shall be provided.  | Supports               | See the following for supporting<br>features:<br>- 1194.21 a, b<br>- 1194.22 l, p<br>- 1194.23 k1, k2, k3<br>- 1194.25 b, j1, j2, j3, j4<br>- 1194.26 d  |

| Section 1194.41 Information, Documentation and Support – Detail   |                        |  |
|---|------------------------|--|
| Criteria  | Supporting<br>Features | Remarks and explanations   |
| (a) Product support documentation<br>provided to end-users shall be made<br>available in alternate formats upon<br>request, at no additional charge   | Supports               | Product support documentation is provided in at least one accessible format, at no additional charge.  |
| (b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge. | Supports               | Documentation includes a description of<br>accessibility and compatibility features<br>that make it easier for people with<br>disabilities to use the product. Those<br>descriptions are available in alternate<br>formats upon request, at no additional<br>charge. |
| (c) Support services for products shall accommodate the communication needs of end-users with disabilities.   | Supports               | Telecommunications Relay Service<br>(TRS) is supported for customers who<br>are deaf or hard of hearing.<br>For support, contact 1-855-2-LENOVO<br>(1-855-253-6686).   |
